

Aftercare Strategic Plan

Through our planning process in 2018 we clarified our strategic purpose and our priorities for the next 3-5 years

Our Strategy Vision - what does success look like?

By 2023...

1. We can clearly demonstrate sustained improvement in the health and wellbeing of our service users;
2. We can define how we improve lifelong mental health and wellbeing through early intervention and
3. We are known for our outstanding, dedicated and skilled mental health workforce.

OUR STRATEGIC FOCUS:

Working together for mental health and wellbeing today and tomorrow.

We are a specialist organisation working in partnership - working with our service users, their family and carers, and with other organisations. We support people with persistent mental health conditions and complex needs to lead fulfilling lives each day and intervene early with at-risk children, young people and families to reduce the lifelong impact of mental health conditions for the next generation.

WE WILL FOCUS ON FOUR PRIORITIES:
